* 3PGE+Au equals platinum + palladium + rhodium + gold by fire assay with ICP-AES Finish;

** Intersection not assayed for 3PGE+Au, as previous work has revealed that this portion of the orebody typically does not contain PGE's at economic quantities

†Values below detection limit of laboratory

[^]Total Ni assay by complete digestion, representing the silicate and sulfide portion of Ni;

Additional drilling is required to determine true thickness;

"Depth From", "Depth To" and "Sample Thickness" reported are depths from surface down the drill hole;

All drillholes are drilled NQ diameter except for Z024 which was drilled BQ diameter
